TITLE: Novel bacteria used for production of L-glutamic acid

INVENTOR: HARA, Y; ITO, H ; IZUI, H ; MATSUI, K ; MORIYA, M ; ONO, E

PATENT-ASSIGNEE: AJINOMOTO CO INC (AJIN), AJINOMOTO KK (AJIN)

PRIORITY-DATA: 1998JP-0297129 (October 19, 1998), 1998JP-0069068 (March 18, 1998)

PATENT-FAMILY:

ABSTRACTED-PUB-NO: EP 952221A
BASIC-ABSTRACT:

NOVELTY - Microorganisms belonging to the genus Enterobacter or Serratia which have the ability to produce L-glutamic acid and, either increased activity of an enzyme catalyzing a reaction in the l-glutamic acid biosynthesis, or decrease activity or deficiency in an activity or enzyme which catalyzes a reaction branching from the pathway of L-glutamic acid biosynthesis, are new.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for the production

L-glutamic acid comprising culturing the microorganism in a liquid culture medium to accumulate the L-glutamic acid in the culture medium and collecting the L-glutamic acid from the culture medium.

USE - The microorganisms are used in a method for producing L-glutamic acid (claimed). The L-glutamic acid is used as an additive in food or in drugs.

ADVANTAGE - The novel bacterium have a high ability to produce L-glutamic acid which improves efficiency and reduces costs.
